

Essential Volunteer Acknowledgement of Responsibility to Perform Daily Personal Health Assessment

To help provide a safe environment for the students and staff at _____ School, school volunteers, deemed essential by the school administration, must share in the responsibility of minimizing the potential spread of the COVID-19 virus. _____ School has implemented numerous precautions and safeguards to help provide a safe on-campus learning environment for the students and staff. However, achieving this goal also depends on school volunteers doing their part. This includes ensuring that each volunteer does not come to school, or attend any school-related activities, if the volunteer is showing signs or symptoms of potentially having the COVID-19 virus.

Accordingly, it is required that the volunteer complete the following daily personal health assessment **each day** before the volunteer leaves home for school or a school-related activity, as follows:

Daily Personal Health Assessment

1. Does the volunteer have a temperature of 100.4 or greater, as measured by a reliable and accurate home thermometer?
2. Does the volunteer have any COVID-19 related symptoms, including persistent non-allergy related cough, shortness of breath, difficulty breathing, chills, muscle pain not attributable to recent activity, sore throat, new rash, GI symptoms (i.e., vomiting or diarrhea), or new loss of taste or smell?
3. Has anyone in the volunteer's household been diagnosed with, or showing symptoms of, COVID-19?
4. Has the volunteer been in recent close contact (i.e., past 48 hours) with anyone exhibiting symptoms of COVID-19 who has tested positive, not been tested, or is waiting for test results?

If the answer is "yes" to any of the foregoing questions, the volunteer is **not permitted** to report to school or attend any school-related activity, and the volunteer must contact the school office immediately. Depending on the circumstances, the volunteer may not be permitted to return to school until the volunteer receives authorization from a healthcare provider that it is safe for the volunteer to return.

Upon arrival at school, as well as throughout the day, volunteers may have their temperatures taken by school staff. If a volunteer has a temperature of 100.4 or greater, or if the volunteer is exhibiting any COVID-19 symptoms, the volunteer must leave school as soon as possible.

The volunteer must sign the second sheet of this document acknowledging that they have read, understood and agree to comply with the terms of this document. The first page of this document must be kept at home for daily review before the volunteer leaves for school or any school-related activity.

I have received, read, understand and agree to comply with the terms of the **Essential Volunteer Acknowledgement of Responsibility to Perform Daily Personal Health Assessment**. If I answer “yes” to any of the questions contained in the Daily Personal Health Assessment, I understand that I cannot report to school or attend any school-related activity, and that I must call the school office immediately. My attendance at school or any school-related activity on any day I am scheduled to volunteer serves as my acknowledgment that I have completed the daily health assessment and that all answers were “no.”
